

Defect Report

Defect ID: BUG-001

Related Test Case: TC_009 – Verify Invalid Email Format

Bug Title: Application allows login to proceed with an invalid email format (missing '@' symbol).

Description: The application allows a user to continue to the password page even when an invalid email address without the '@' symbol is entered. Instead of displaying an email format validation message on the login page, the application accepts the invalid email and proceeds to the next step.

Steps to Reproduce:

1. Open the application.
2. Click Sign In.
3. Enter 'pradeepgmail.com' in the Email field.
4. Click Continue.

Test Data: Email: pradeepgmail.com

Expected Result: The application should display an 'Invalid email format' validation message and should not allow the user to continue to the password page.

Actual Result: The application accepts the invalid email address and proceeds to the password page without displaying any validation message.

Status: New

Bug Assignee: Development Team

Bug CC: QA Lead, Project Manager

Reported On: 02-07-2026

Browser: Microsoft Edge Version 149.0 (Windows)

Bug Type: Functional

Environment: Windows 10 (64-bit)

Microsoft Edge 149

Tichi Stage Environment

Component: Login Module

Priority: P2 – High

Severity: Major

Severity Justification: The application bypasses client-side email format validation and allows users to continue with invalid input. Although authentication may eventually fail, the validation logic is incorrect and affects the user experience.

Reporter: Pradeep kumar

Reproduces: Always

URL: <https://tichi-app-webapp-stage.web.app/login>

Build Number: Stage Build (Current Web Deployment)

Attachment: None

Evidence:

This defect report is prepared based on the hypothetical issue specified in the assignment:

"The application allows users to log in with an invalid email format."

During execution, the current application validates invalid email formats using browser-level validation. Therefore, the issue could not be reproduced in the current build, and no supporting screenshots are available.
